- ✓ Colleferro is a typical example of town developed near an industrial area

# ***UPP-SOL & COLLEFERRO***

The Municipality of Colleferro has mainly 2 roles in the project:

- be one of the site where the experimental validation of the new system will be performed
- contribute to the project dissemination activities

# ***UPP-SOL & COLLEFERRO***

A demonstration system is a powerful dissemination tool, so it is important to locate it close to the target audience, to facilitate its introduction to the relevant market.

Colleferro will test the new system in pre-existing buildings, by the fact the plants assigned to are :

- a school in via Nobel street,
- and the municipality offices

# ***UPP-SOL & COLLEFERRO***

The **dissemination activities** will include:

1. Publications and press: we plan to print brochures, leaflets and poster presenting the project to the general public and to PA's at local, regional and national level;
2. Online communication tools: we'll notice about the project on web sites targeting Public Administrations and presenting the best practices in Cities management and planning
3. Conferences, seminars and workshops

# ***UPP-SOL & COLLEFERRO***

## **Expected results**

The putting into effect of the project will certainly give the stimulus to other initiatives related to the use of the UPP-Sol realized technologies which go in the direction to promote the sustainable development in energy field, to the signboard of the maximum competitiveness, from a side, and the ambient protection on the other side.
